# CLENPIQ® Medication & Safety Guide

## 3. MEDICATION ADJUSTMENTS

| WHEN TO STOP                 | MEDICATION TYPE                          | COMMON EXAMPLES                                                                                                                                                |
|------------------------------|------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>STOP<br/>7 DAYS PRIOR</b> | GLP-1 medications                        | Ozempic®, Wegovy®, Rybelsus® (semaglutide); Mounjaro® or Zepbound® (tirzepatide); Trulicity® (dulaglutide); Victoza® or Saxenda® (liraglutide)                 |
| <b>STOP<br/>7 DAYS PRIOR</b> | Phentermine / weight-loss medicines      | Adipex-P® (phentermine) and combination weight-loss medicines containing phentermine                                                                           |
| <b>STOP<br/>5 DAYS PRIOR</b> | Iron, multivitamins, fish oil, and fiber | Ferrous sulfate; prenatal vitamins or multivitamins; omega-3/fish-oil supplements; Metamucil®, Citrucel®, Benefiber®, psyllium, methylcellulose, wheat dextrin |
| <b>STOP<br/>3 DAYS PRIOR</b> | SGLT-2 inhibitors                        | Jardiance® (empagliflozin), Farxiga® (dapagliflozin), Invokana® (canagliflozin), Steglatro® (ertugliflozin)                                                    |
| <b>STOP<br/>7 DAYS PRIOR</b> | Aspirin                                  | Full-dose aspirin and aspirin-containing products. Baby aspirin (81 mg) is NOT stopped — keep taking it as usual.                                              |
| <b>STOP<br/>7 DAYS PRIOR</b> | NSAIDs                                   | Advil®, Motrin® (ibuprofen), Aleve® (naproxen), and similar anti-inflammatory pain relievers. Tylenol® (acetaminophen) is okay.                                |

**IMPORTANT:** Do not stop prescription blood thinners or diabetes medicines unless your prescribing clinician or the procedure team gives you specific instructions.

## 4. MEDICATION INSTRUCTIONS FOR THE DAY OF PROCEDURE

### DIABETIC PATIENTS - Follow these medication instructions.

- Insulin-dependent patients may take insulin if necessary, but at half the usual dose with close monitoring of glucose. Keep a sugary clear liquid available if necessary to regulate your blood sugar. Nothing by mouth 2 hours prior to your procedure.
- Non-insulin-dependent diabetic patients: hold your oral diabetic medication until after your procedure.

### OTHER MEDICATION & CONDITION INSTRUCTIONS

- Unless your doctor gave you other instructions, prescribed medication(s) may be taken as scheduled with a small sip of water at least 3 hours before your procedure. Do not take anything else by mouth until your procedure is completed.
- Asthma patients: bring your inhaler to your appointment.
- It is imperative that you take all seizure and blood pressure medication on the morning of the procedure unless otherwise specified.**

## 5. CLEAR LIQUID EXAMPLES

| ALLOWED                                                                                                                                                                                                                                                                                                                      | NOT ALLOWED                                                                                                                                                                                                                 |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <ul style="list-style-type: none"> <li>Water</li> <li>Clear broth or bouillon</li> <li>Apple juice or white grape juice</li> <li>Lemonade without pulp</li> <li>Sports drinks</li> <li>Clear soda or ginger ale</li> <li>Tea or coffee without milk or creamer</li> <li>Gelatin and ice pops without fruit pieces</li> </ul> | <ul style="list-style-type: none"> <li>Any solid food</li> <li>Milk, cream, or non-dairy creamer</li> <li>Orange juice or any juice with pulp</li> <li>Smoothies</li> <li>Alcohol</li> <li>Red or purple liquids</li> </ul> |

## 6. IMPORTANT SAFETY & TRANSPORTATION

- Driver must be age 18 or older and remain onsite.
- No Uber, Lyft, taxi, or public transportation.**
- No driving, work, or legal decisions for **24 hours**.
- Tell your doctor if you have a heart valve replacement, take blood thinners, or use insulin.
- You MUST have someone drive you home after the procedure.**

**\$150.00 NO-SHOW FEE**

**Procedures not cancelled within 3 business days will incur a \$150.00 fee.**
